PROFESSIONAL SUMMARY

Motivated Computer Science & Engineering student with hands-on experience building responsive, accessible web interfaces and full-stack applications using React.js, Node.js, and MongoDB. Skilled at converting UI/UX designs into clean, efficient code, integrating third-party and REST APIs, and collaborating with design teams to deliver polished client-facing products. IBM-certified in Data Science for Python. Comfortable working independently or in a team, learning new platforms and tools quickly, and shipping maintainable code under real project deadlines. Seeking a full-stack development internship to contribute to multi-client web projects.

TECHNICAL SKILLS

Languages: C · Python · Java · JavaScript

Frontend & UI Implementation: HTML5 · CSS3 · React.js · Tailwind CSS · Responsive & Mobile-First Design · UI/UX Implementation from Wireframes

Backend & Database: Node.js · Express.js · MongoDB · REST API Design & Integration · SQL Basics

Design & Tools: Figma (UI/UX Design) · Git & GitHub · VS Code

Practices: Website Performance Optimization · Debugging & Testing · Cross-Browser Compatibility · Basic SEO Principles

PROJECTS

Eco Verse — Sustainability Web Application — Google Solution Challenge

2026

- Built a full-stack sustainability platform for ecosystem conservation and environmental awareness as part of the Google Solution Challenge.
- Converted UI/UX design concepts into responsive, accessible React.js components with Tailwind CSS, following a mobile-first approach.
- Designed and implemented RESTful APIs with Node.js and Express.js, backed by MongoDB, for efficient data storage and retrieval.
- Built interactive, dynamic content features to improve engagement, accessibility, and overall site performance.
- Collaborated within a team using component-based architecture to keep the codebase clean and scalable.

Stack: React.js · Node.js · Express.js · MongoDB · Tailwind CSS · REST APIs · Git & GitHub

Cybersecurity Incident Clustering — Data Science Project (IBM)

2025

- Developed a data science project under IBM to analyze and cluster cybersecurity incidents using unsupervised machine learning techniques.
- Applied Python-based data preprocessing, feature engineering, and clustering algorithms to group similar security incidents and identify patterns.
- Used exploratory data analysis and visualization to interpret incident clusters and surface actionable insights.
- Evaluated clustering performance and refined models to improve grouping accuracy.

Stack: Python · Pandas · NumPy · Scikit-learn · Data Visualization

Online Tiffin Service Platform — Full-Stack Web Application

2025

- Implemented user authentication with role-based access control (Customer / Admin / Vendor).
- Designed responsive UI/UX in Figma using a mobile-first approach, then implemented the designs in production code.
- Built RESTful APIs with Node.js & Express.js, with MongoDB handling data persistence.
- Delivered a real-time order tracking dashboard for vendors and customers.

Stack: React.js · Node.js · Express.js · MongoDB · Figma · CSS3

Basic Weather Application — Frontend Web Application, API Integration

2024

- Integrated the OpenWeatherMap third-party API to fetch live temperature, humidity, wind speed, and weather conditions.
- Built a clean, responsive UI with HTML5, CSS3, and JavaScript, including dynamic content updates.
- Implemented search functionality with error handling for invalid city inputs.
- Added weather icons and dynamic background changes based on conditions to improve UX.

Stack: *HTML5 · CSS3 · JavaScript · OpenWeatherMap API*

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2023 – 2027 (Expected)

Integral University, Lucknow, Uttar Pradesh | Currently in 4th Year | CGPA: 9.0

Higher Secondary Certificate (Class XII) — Science (PCM)

2020 – 2021

Kendriya Vidyalaya Mughalsarai, Uttar Pradesh | Marks: 83%

Secondary School Certificate (Class X)

2018 – 2019

Kendriya Vidyalaya Mughalsarai, Uttar Pradesh | Marks: 92.8%

CERTIFICATIONS

- Data Science for Python — IBM · Verified Credential
- Introduction to Generative AI and Agents — Microsoft
